

SC_SEBOL_Changelog

1.6.1-SNAPSHOT (HEAD)

- crawler plugin for heritrix: switched to version 1.14.4

1.6.0 (REL_1_6_0_1_20100820_BUGFIX_timestamp_range)

- internal: Navigator, NavigatorRange, NavigatorValue now have ID, NavigatorValue interface now readonly
- added BoostDocumentByValueProcessor
- performance optimizations

1.5.2 (Tag: REL_1_5_2_20100811_generic_navigators)

- multiple messages in ResultStatus
- generic navigator framework

1.5.1 (Tag: REL_1_5_1_20100727)

- added parameters to result classes
- added originating index name to result item
- added support for field type LONG in DateFormatProcessor
- added configurable default analyzer class to IndexServer

1.5.0 (Tag: REL_1_5_0_20100723)

- upgraded to lucene 3.02
- rewrite of php client: better performance
- rewrite of NavigatorManagerImp, added caching
- switched from MultiSearcher to MultiReader
- rewrite of navigator count logic: better performance
- added field caching for navigator counting in IndexReader
- added file system sync server (FsSyncServerImpl)
- added immediate commit in index requests
- added IndexManager, moved all index configuration to IndexManager
- added IdGeneratorUUIDImpl

1.4.0 (Tag: REL_1_4_0_20100512)

- added TikaFileParserProcessor: multi format document parsing with Apache tika
- added processor interface for processing queries
- added CustomScoreQueryProcessor: calculate dynamic score at search time
- added module 'crawler' with Heritrix plugin SebolIndexWriterProcessor for indexing crawled websites
- added highlighting of search terms in search result
- added possibility to configure TermVector storage for fields
- added ExtractRegexProcessor
- added REST interface (JSON/JSONP)
- added API key for JSON/JSONP interface
- added methods to Navigator to fetch zero count values and to truncate value list

1.3.0 (Tag: REL_1_3_0_20100114)

- upgraded to Lucene 2.9.1/3.0
- centralized field config
- field and document boosting (indexer)
- tag-to-content extraction in HtmlParserProcessor
- multi field search
- added BoostDocumentByDateProcessor
- added IncreaseRelevanceByDateProcessor
- reloadable config of ChainRunnerManager via JMX

1.2.1 (Tag: REL_1_2_1_20100111_nav_value_sort)

- sort order of navigator values manageable in db: table NAVIGATOR_VALUE, column nav_sort

1.2.0 (Tag: REL_1_2_0_20091215_release_bihk)

- Sorting of navigatorRanges
- IndexServer JMX interface: commit(), clear()
- HtmlParserProcessor: encoding, title field, content field configurable
- AbstractFieldTriggeredProcessor: parameter valuePattern now multivalued

1.1.0 (Tag: REL_1_1_0_20091130_multi_document)

- multi-document indexrequests
- added AccumulateFieldsProcessor

- added Base64DecodeProcessor
- added CopyFieldProcessor
- added RemoveFieldsAndValuesProcessor
- added ReplaceValueProcessor
- added XmlXPathProcessor
- cleaned up JMX interfaces
- added QueryParserWithCollation for querying numeric ranges
- Sorting of Navigators and NavigatorValues

1.0.3

- new php client
- workaround for MySQL getConnection() problem
- hierarchical navigators
- extended FieldValidationProcessor
- added CopyFieldProcessor
- added RemoveFieldsAndValuesProcessor
- added ReplaceValueProcessor
- added occurrence feature in Navigator/NavigatorValue/NavigatorRange
-

1.0.2 (Tag: REL_1_0_2_20091022_Reworked_modules_and_added_client)

- reworked modules, moved common packages and classes to common module
- added java RPC client classes

1.0.1 (Tag: REL_1_0_1_20091015_Final_major_release_fix)

- fixed dependencies in sebol-server-webapp

1.0.0 (Tag: REL_1_0_0_20091015_Final_major_release)

- JDBC-Queue Generalisierung, mit spezialisierter Derby-Unterklasse
- "fetch"-Parameter in Navigator: nur Values/nur Ranges/beides
- JMX-Interfaces aufgeräumt, optimize für QueuingIndexServer, requeue für JournalingIndexServer, optimize (Navigator) für IndexServer
- Code-cleanup und Performance-Tuning im SearchServer, hauptsächlich Navigatoren, Ranges
- Javadoc

0.9.9
